

TULIKOE

Idea:

TULIKOE is a game, where the player is trying to find the fastest, most optimal way to climb a tower whilst escaping the rising lava. The level ends when the player reaches the tower's highest level and touches the fire diamond.

Goals:

- Reach the top of the tower
- Beat your high score

Mechanics:

- Basic WASD movement
- Dash either left or right to reach certain areas
- Climbing ropes or ladders (possibly)
- Timer & highscore system (possibly even a star rating?)
- Level reset button in case of a grave mistake

Level design:

- Multiple ways to reach the goal
- Multiple ways to traverse (eg. jump pads)

Art style:

- Blocky, simple and clear 16x16 pixel art graphics
- 8-bit sounds and ambient/looping background music
